

AMENDMENTS TO THE ABSTRACT OF THE DISCLOSURE

Please amend the Abstract by rewriting same to read as follows.

~~The present invention is an~~ An antenna apparatus capable of receiving AM radio broadcasting and FM radio broadcasting and being realized at a low cost. ~~An~~ includes an FM antenna conductor ~~(2)~~ for receiving FM broadcasting ~~is~~ formed with a metal pipe with good conductivity, and an AM antenna conductor ~~(5)~~ for receiving AM broadcasting ~~is~~ housed in a an internal space portion (2a) of the antenna conductor, so as to unify an AM antenna and an FM antenna with a simple structure. ~~In addition, in this case, the~~ The FM antenna conductor ~~(2)~~ also functions as an electrostatic shielding member for the AM antenna conductor ~~(5)~~, so that ~~conducted high frequency high-frequency~~ high-frequency noise from other equipment is prevented from being received at the AM antenna conductor ~~(5)~~ as interference noise without raising the cost.
